Work Experience:

DevOps Engineer

11/2022 - Present

Contour software (IDS)

- Analyze current technology utilized within the company and develop processes to improve and expand upon them leveraging modern techniques
- Manage and administer Dev, QA, and Production Ansible environments used company wide
- Convert existing manual workflows into automated playbooks using Ansible
- Partner with QA team to create and troubleshoot Jenkins builds
- Collaborate with the software development & QA teams to automate the setup and maintenance of application and database servers (Windows & Linux)
- Create automation scripting in - Bash, YAML, PS, etc.
- Software package management
- Troubleshooting of CI/CD pipelines, including network tracing and backend log analysis

Product Support & DevOps Engineer (Azure)

11/2021 - 10/2022

Softech Worldwide

- Install, Deploy & Support VIDIZMO products On-Premises, Azure & AWS Cloud Infrastructure in VIDIZMO SaaS and Customer's On-Premises/Cloud environments.
- Performed Tier1, Tier2, Tier3 product deployments on SAAS, PAAS environments Specially Azure.
- Provide T3, T2 cloud support to customers for both AWS & Azure.
- Design and manage scalable and resilient cloud infrastructure.
- Implement, monitor and maintain Microsoft Azure solutions, including major services related to compute, storage, network, RDMS and so on.
- Experience with continuous integration and continuous delivery (CI/CD) automation pipelines (Azure DevOps) Hands on experience on Linux.
- Background in Docker, Azure monitoring, alerting, and diagnostics, including Application Insights, Log Analytics, Network Monitoring, Service Health, and dashboards.
- Basic PowerShell scripting for automation.
- Design, develop automated deployment (ARM template), monitoring, backup recovery systems.
- Deploy broker services such as Dapper, Kafka, RabbitMQ through docker container on different environments.
- Hands on experience SSL certs (PFX, PEM, root chain certificate) through open SLL.

DevOps Engineer with QA & Support in responsibilities

10/2020 - 10/2021

HCS Consulting Services

QA:

- Performed various manual testing techniques like (Functional, Interface, Unit, Integration, System, performance & security testing) on many platforms applications including Linux, Android, desktop, iOS.
- Managing & testing inventory, sales orders, sales return product, GRN, cash manager SKU's on Odoo (ERP) is my priority work.
- Performed automation on a web application using j meter & some Automated tools like ghost inspector and smart bear. Get & Post API testing through postmen is on my hand.

SUPPORT:

- Provide support for their marts including troubleshooting on every Linux (POS) machine handling kernel panics issues, hardware, and software related issue provide L3 and L2 support on the front is my priority.
- solving UAT issues after the project lives is also my part have to look forward to all the issues that occur before and after the deployment and provide support for it.

DevOps Engineer:

- Having the responsibility of DevOps Engineer deploying build on different platforms like Linux droplets and windows machine was my priority task.
- Maintaining cloud servers like Microsoft Azure, Amazon EC2 instance, Digitalocean droplets is also part of my work.
- configures and deploy whole web servers like Nginx and Apache on amazon ec2 instance or azure cloud and install the certificates through certbot and openssl .
- Handling ERP (odoo) and provide T3 and T2 support to customer's including troubleshooting on the Postgres database was my priority task.
- Automated the whole process of Postgres database backup through AWS CLI and stored all the backups in to s3.

Network Security Administrator

04/2020 - 08/2020

Galaxy Broadband

- Configured security systems such as firewalls, antivirus, and IDS/IPS software and Monitored network traffic for suspicious behavior.
- Configured load balancer and traffic for a specific bandwidth.
- Performed vulnerability tests across all network segments.

Linux System Administrator

07/2019 - 09/2019

Zaibis Electronics

- Worked in Ubuntu AOSP, build AT Shell File for smartphones to configuring kernel.
- Performed patching, compiling, securing, and troubleshooting Linux servers on various devices.
- Learned how to identify the discrepancies in the system, to assess the risks, and to implement solutions by adhering to the security standards.
- Worked in Android NDK (Native C), build binaries in ARM architecture accessing Android OEM.

Junior QA Tester

01/2019 - 03/2019

BMC - Solution

- System, Unit, Acceptance, Regression, Load, and Functional/Performance testing on the real-time application.
- Build Test cases for various application including Desktop and Android.

Education:

Bachelor of Computer Science

2016 - 2020

Bahria University Karachi

Intermediate (Pre - engineering)

2015 - 2016

Govt College Gulshan

Certifications:

Google Cloud Certifications

05/2021 - 08/2021

All these courses certificates are available on my QR code you can scan it and visit the GCLOUD profile.

1. Deploy to Kubernetes in Google Cloud Earned Aug 5, 2021.
2. Cloud Architecture Earned Aug 5, 2021.
3. Kubernetes in Google Cloud Earned Aug 5, 2021
4. Implement DevOps in Google Cloud Earned Aug 3, 2021
5. DevOps Essentials Earned Jul 16, 2021
6. Cloud Architecture: Design, Implement, and Manage Earned Jun 30, 2021
7. Set Up and Configure a Cloud Environment in Google Cloud Earned Jun 25, 2021
8. Perform Foundational Infrastructure Tasks in Google Cloud Earned Jun 11, 2021
9. Create and Manage Cloud Resources Earned May 30, 2021

Network Server Security Certified

08/2020 - 09/2020

Network server security focuses on the protection of data and resources held on servers. It utilizes tools and techniques that help prevent intrusions

Diploma in Amazon Web Services

10/2020 - 11/2020

Amazon Web Services (AWS) is the leading cloud services organisation in the world and they have massive expansion planned for 2020 and beyond. In this course the area we covered

Oracle Autonomous Database

07/2020 - 10/2020

This course demonstrated the knowledge required to provision, manage, monitor and migrate workloads to Autonomous Database, both on shared and dedicated Exadata infrastructure

Microsoft Office Certified

2019 - 2020

MS (word-office-power point-excel)

Projects:

Point Of Sale

A node and react base application in which we provide cash manager, Grn, wish list, price checker, online order and credit register. QA, DevOps, implementation and support is my part in this project.

Veziu

HCS Consulting Services

An application similar to AIRBNB where in-person or online activities hosted by inspiring local experts. They go beyond typical tours or classes by immersing guests in a Host's unique world. You can earn money while sharing your hobby, skills, or expertise with the community. You'll have the opportunity to connect with millions of travelers and locals searching for unique experiences they might not find through more traditional channels. We are using AWS in this project the whole QA DevOps is my part.

Call Center

HCS Consulting Services

A simple application that is currently using in local tele card company. I did the QA of this whole project.

Kitchen konnection

HCS Consulting Services

Kitchen Konnection is a platform for home based kitchen and small food business operating from home to get connected with customers with in their local community easily and effectively. I did the QA and DevOps part in this project now providing support for it.

AT Shell Elf Binary on Linux

Zaibis Electronics

In this project, We are generating a reverse shell elf binary, that will execute it on a remote system that is our android mobile and directly hit on oem rill so that we will get back the OEM hock raw command that will run our elf in JVM. After that we can use our AT+ command to get the info whatever we want. I lead and develop this project from the scratch and completed on a dedicated timeline.

Skills

- Jmeter
- Automation
- DevOps
- Digital Ocean
- Odoo ERP
- Digital ocean
- Jenkins
- AWS
- Support
- G cloud
- ubuntu
- LINUX Server Administration
- SQL injection
- WAF bypass
- Mobile Application Penetration Testing
- Linux OEM Rill
- Linux System Support
- OpenSSL
- Azure
- Docker and containers
- Arm Template
- Kali Linux
